

GenSens Summarization Seed Prompt Pool

50 unique base prompts for CNN/DailyMail

Drop-in ready for paraphrase generation (5 paraphrases per prompt → 250 variants per article)

Overview

This file specifies the 50 seed prompts that feed the GenSens paraphrase generator for the CNN/DailyMail summarization task. Each prompt is a self-contained summarization instruction with a `{{article}}` placeholder, ready to be paraphrased into 5 semantically-equivalent variants and instantiated across the 200-article evaluation set.

Attribute	Value
Total seed prompts	50 (unique)
Pool A — Free-form paraphrase seeds	35
Pool B — Prose-constrained stress seeds	15
Paraphrases per seed (planned)	5
Total paraphrase variants per article	250
Target evaluation articles	200 (CNN/DailyMail test)
Total (article × variant) pairs	50,000
Placeholder	<code>{{article}}</code>
Format on disk	JSONL + CSV

Dimension coverage

Pool	Category / Dimension	Prompts
A	D1 · Direct Command	A01 – A04
A	D2 · Question Form	A05 – A08
A	D3 · Role Based	A09 – A12
A	D4 · Constraint Based	A13 – A15
A	D5 · Analytical Framing	A16 – A19
A	D6 · Output Format	A20 – A22
A	D7 · Audience Perspective	A23 – A25
A	D8 · Emphasis Focus	A26 – A28
A	D9 · Tone Register	A29 – A32
A	D10 · Completeness Framing	A33 – A35
B	Lexical Filter (banned / forced words)	B01 – B03
B	Theme Isolation (single thematic slice)	B04 – B08
B	Persona / Tone (audience-specific)	B09 – B14
B	Meta-reflection	B15

Usage

Each seed prompt is fed to the paraphrase generator via its `base_text` field (the instruction only). The generator produces 5 SBERT- ≥ 0.82 -similar paraphrases per seed. For each paraphrase, substitute back into the `base_prompt` template by replacing `{{article}}` with the article body. This yields $50 \times 5 \times 200 = 50,000$ unique full prompts to send to each subject model.

Pool A — Free-form Paraphrase Seeds (35)

Direct Command

A01 · complexity 2

Summarize the following news article in 3-4 sentences, capturing the main events and key details.

A02 · complexity 1

Extract the most newsworthy information from the following news article.

A03 · complexity 1

Condense the following news article into its most essential points.

A04 · complexity 2

Restate the main developments in the following news article in your own words.

Question Form

A05 · complexity 2

What is the main story being reported in the following news article?

A06 · complexity 2

What events or decisions led to the situation described in the following news article?

A07 · complexity 2

What is the most significant development described in the following news article?

A08 · complexity 2

What does the following news article want the reader to understand?

Role Based

A09 · complexity 2

As a news editor, write a short front-page summary of the following article.

A10 · complexity 2

Acting as a research assistant, extract the key findings from the following news article.

A11 · complexity 2

Imagine you are a news anchor introducing this story on television. Write a brief introduction based on the following article.

A12 · complexity 2

As a librarian creating a catalog entry, write a short description of what the following news article covers.

Constraint Based

A13 · complexity 2

Write a one-sentence summary of the following news article.

A14 · complexity 2

Give a three-part summary of the following news article: context, main event, and outcome.

A15 · complexity 2

Summarize the following news article using only plain, everyday words — avoid jargon or technical language.

Analytical Framing

A16 · complexity 2

For the following news article, identify the who, what, when, where, and why.

A17 · complexity 2

Analyse the following news article and explain the cause-and-effect relationship it describes.

A18 · complexity 2

Break down the following news article into its main claim and the key facts that support it.

A19 · complexity 2

What is the underlying conflict described in the following news article, and how is it being addressed?

Output Format

A20 · complexity 2

Write 3 bullet points summarizing the most important information from the following news article.

A21 · complexity 2

Create a short headline and a two-sentence summary for the following news article.

A22 · complexity 2

Write a numbered list of the 3 most important takeaways from the following news article.

Audience Perspective

A23 · complexity 2

Explain the following news article to someone who has no background knowledge on the topic.

A24 · complexity 2

Summarize the following news article for a busy executive who only has 30 seconds to read it.

A25 · complexity 2

Write a summary of the following news article that would be easy for a high school student to understand.

Emphasis Focus

A26 · complexity 2

Summarize the following news article focusing specifically on the people involved and their roles.

A27 · complexity 2

Describe the timeline of events in the following news article in chronological order.

A28 · complexity 2

Summarize the following news article by highlighting its potential impact or consequences.

Tone Register

A29 · complexity 1

Write a formal, objective summary of the following news article.

A30 · complexity 2

Give a casual, conversational overview of what the following news article is about.

A31 · complexity 2

Write a vivid, journalistic account of the events described in the following news article.

A32 · complexity 2

Write an engaging, reader-friendly summary of the following news article that makes someone want to read the full story.

Completeness Framing

A33 · complexity 2

What is the single most important takeaway from the following news article?

A34 · complexity 2

Summarize the following news article from start to finish, preserving the logical flow of events.

A35 · complexity 2

Summarize the following news article capturing both the factual content and why the story matters.

Pool B — Prose-Constrained Stress Seeds (15)

These seeds impose lexical, thematic, or stylistic filters on the output — testing whether small paraphrase changes cause the model to violate the constraint. The paraphraser system prompt for these seeds explicitly instructs the model to preserve the constraint in every rephrased version.

Lexical Filter

B01 · complexity 3

Summarize the events of the following news article comprehensively without using any proper nouns — no names of specific people, cities, countries, or organizations.

B02 · complexity 3

Summarize the following news article without using the words 'said', 'reported', 'police', 'government', or 'stated'.

B03 · complexity 3

Write a summary of the following news article that seamlessly integrates the words 'catalyst', 'unprecedented', and 'ramifications' into your response.

Theme Isolation

B04 · complexity 3

Extract and summarize only the data points, events, and implications related to financial impact, economic policy, or market reactions in the following news article. Ignore all other narratives.

B05 · complexity 3

Rewrite the core narrative of the following news article entirely from the perspective of the individual or organization that suffered the most negative impact.

B06 · complexity 3

Summarize the primary argument driving the conflict in the following news article, followed by a summary of the opposing viewpoint.

B07 · complexity 3

Identify the underlying sentiment or framing of the journalist in the following news article. Summarize the facts in a way that actively strips away that specific bias.

B08 · complexity 3

Ignore the background context in the following news article. Summarize only the direct, immediate aftermath and the stated future consequences of the events.

Persona / Tone

B09 · complexity 3

Provide a high-level executive brief of the following news article suitable for a CEO, focusing solely on strategic impact, final outcomes, and actionable risks.

B10 · complexity 3

Explain the main events of the following news article using simple, conversational language suitable for a middle school student, stripping away all journalistic jargon.

B11 · complexity 3

Summarize the following news article in a strictly clinical, neutral tone. Strip away all emotional adjectives, quotes, and narrative flair.

B12 · complexity 3

Rewrite the core facts of the following news article into a punchy, sensationalized introductory paragraph designed to hook readers for a morning email newsletter.

B13 · complexity 3

Summarize the following news article in the style of an academic research paper abstract, focusing on methodology (how the event happened) and findings (the result).

B14 · complexity 3

Summarize the claims made in the following news article in a highly skeptical tone, highlighting what evidence is missing or glossed over by the author.

Meta-reflection

B15 · complexity 3

First, provide a standard 50-word summary of the following news article. Then, write a second paragraph critiquing your own summary, pointing out what nuance you failed to capture.

Output Files

File	Format	Purpose
gensens_summ_50_seed_prompts.jsonl	JSONL	Drop-in input for paraphrase generator; one seed per line
gensens_summ_50_seed_prompts.csv	CSV	Reviewable spreadsheet for manual QC
gensens_summ_50_seed_prompts.pdf	PDF	This document — paper-appendix-ready reference

JSONL record schema

Each line in the JSONL file is a JSON object with the following fields:

Field	Type	Description
prompt_id	string	Unique ID: A01...A35 (Pool A) or B01...B15 (Pool B)
pool	string	'A' or 'B'
dimension	string	Dimension name (e.g. 'Direct Command')
complexity	int	1 = simple imperative, 2 = moderate, 3 = detailed
base_text	string	Instruction only (feed this to the paraphraser)
base_prompt	string	Full template with {{article}} placeholder
task	string	'summarization'
dataset	string	'cnn_dailymail'

Prepared as part of the GenSens prompt-sensitivity research programme. Companion file to the hybrid benchmark design document.
